

### Cheap Talk – Guiding Questions

- You are of course free to design your talk in the way you prefer.
- Here are a couple of questions that we would love to see discussed during your talk
  - \* Why is your research relevant?
  - \* What can laypeople learn from your research?
  - \* What are limitations of your research? What do we not know so far?
  - \* Did you apply your research? What are areas in which you would like to test applications of your research?
